## PROJECTS

### Nutrichef - Koki Sehat

July 2024

- An Android app designed to provide recipe recommendations by detecting food ingredients. When the app detects specific ingredients, it automatically displays a list of recipe suggestions that incorporate all detected ingredients. The app offers an intuitive interface for scanning ingredients and provides recipe options in real-time based on the items detected, helping users to cook efficiently with what they have on hand.

### Lawbot (Chatbot Hukum di Indonesia - Personal Project)

February 2023

- A legal chatbot application that uses a custom model dataset based on Indonesian law
